

Heath Planning Board Meeting

Date 7_14_2021

Meeting called to order at 3:03 pm. Location: Virtual - Zoom

Attendance: Douglas Mason, Bill Gran, Jo Travis, Robert Viarengo

Others in Attendance:

Discussion points:

DO:

Drone flight, viewing by neighbors and panoramic images.

Put panoramic images and my balloon test images into the record.

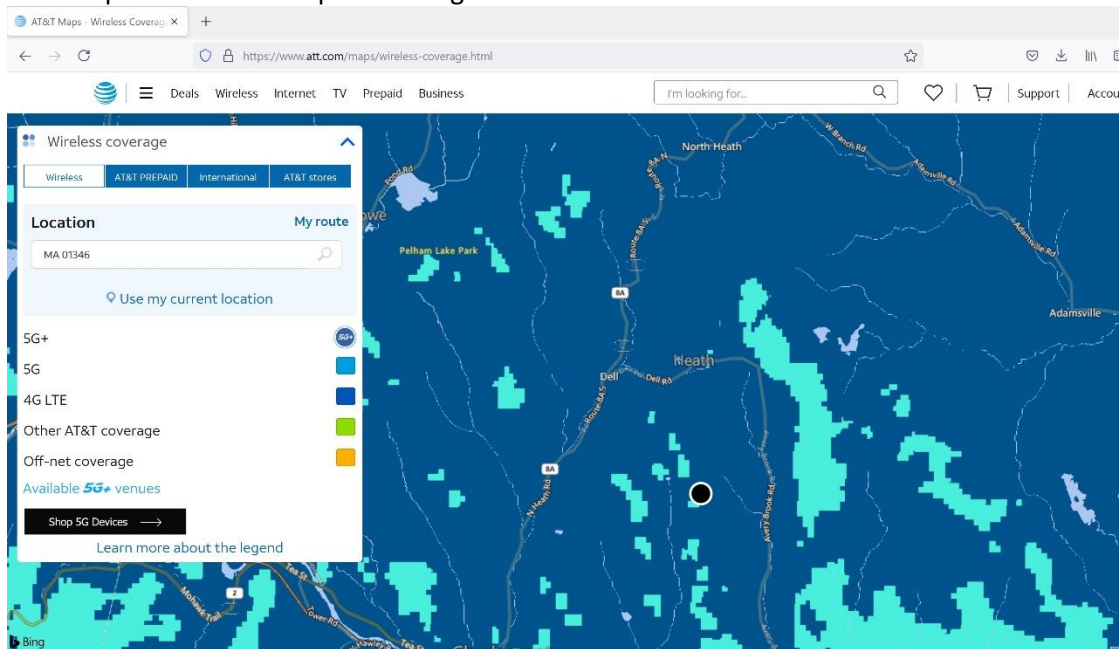

Call Bill Lattrell and discuss the environmental plan and updated plan. Stream Crossing?

Ask Jim Hawkins if ATT can get, or needs, a building permit for the property with (225') of road frontage?

Questions for ATT:

- Actual denial of service data from ATT - location, times and numbers of dropped calls and signal strength. Software simulations (propagation maps) are not acceptable to show an actual, substantial Gap in coverage.
- Will each carrier on this tower have their own diesel or gasoline backup generator?
- Is the driveway marked? Width and length?
- Where are Affidavits?
- Please tell us how many diesel or gasoline backup generators will be allowed on this site. And how they fit into the current environmental plan.
-

Current published ATT map of coverage for Heath:

ATT needs to prove that there is a “Significant Gap” in coverage, they have not.

Bill moved that we close the meeting at 3:28, Bob seconded.

Meeting closed at 3:28

Respectfully Submitted by

Douglas Mason
